FREE Field course for pre-service Teachers!
Geol 197 / Geos 898: Fundamentals of Geoscience in the Field
June 13-28, 2020

About the course

This course is directed towards pre-service science education majors (both undergraduate and graduate). It comprises a 16-day, inquiry-based field course and a science immersion and discovery experience in Wyoming, Nebraska and South Dakota (field route marked on globe). The primary aim of this course is to expose education majors to geoscience principles to improve an educators' ability to teach inquiry, gain knowledge and understanding of geoscience, and to demonstrate effective teaching methods that can integrate geoscience into K-12 environments.

Details

All costs for transport, food, accommodation will be covered by UNL through a grant from the National Science Foundation. In short, you will get a fantastic trip, three college credits, and amazing first-hand exposure to geoscience. In-state Tuition and Fees for those accepted into this program will also be covered.

Priority deadline: April 1, 2020 (applications will be accepted until all positions are filled)
Apply Here: https://cse.unl.edu/scimath/apps (application opens in early January)
Questions? Contact Dr. Mindi Searls (msearls2@unl.edu) or David Harwood (dharwood1@unl.edu)

“This is truly the best course I have ever taken. I learned more about geology, myself, others, life, etc. than I ever have or could have in one year.”

“This is truly the best course I have ever taken.”  “I felt like I was on ‘Survivor’, and I was succeeding.”
