2020 UNL Math in the Middle Program

We are pleased to accept applications from teachers who teach math in grades 4-8 to participate in Math in the Middle, a 36-hour graduate program leading to a Master of Arts for Teachers degree from the University of Nebraska–Lincoln’s Department of Mathematics. **Apply now!**

- Ideal for teachers who enjoy teaching mathematics and seek to develop special strengths in mathematical and pedagogical knowledge, which leads to enhanced student learning in their classrooms.

- Teachers selected for Math in the Middle will take at least two classes for 6 graduate credits in Summer 2020. The two required courses are Math 800T: Mathematics as a Second Language and Math 802T: Functions, Algebra and Geometry. See the website for more details about when these courses are being offered.

- Teachers wanting a quick start this summer can consider additional coursework and earn up to 12 credits.

- Even though Summer 2020 courses are delivered via remote learning, tuition will be set at the in-person tuition rate and the University Program and Facilities Fee is waived. The 20% tuition discount still applies.

- Teachers who already have some graduate credit will work with an advisor to request credit for previous courses, thus further accelerating their time to degree.

Applications are due May 18, 2020 for the Master of Arts for Teachers degree program, also known as Math in the Middle. There are two applications to complete:

1) Apply to be accepted to the Master of Arts for Teachers degree (MAT) program via CollegeNet: [https://go.unl.edu/gradapp](https://go.unl.edu/gradapp).

2) Apply for NMSSIFellowships and also indicate your interest in joining the Math in the Middle cohort for Summer 2020 at [https://go.unl.edu/scimathapply](https://go.unl.edu/scimathapply). Math in the Middle teachers will be given top priority for fellowship funding.
